

INTRODUCTION

Our **CRYSTAL BOLLARDS** has been designed to protect structures and equipment from impact damage caused by heavier vehicles or in environments where vehicles circulate at high speed.

CRYSTAL BOLLARDS consists of composite resins, covered with Stainless Steel (304 / 316L) (not painted), to be easy to clean, with an attractive appearance

BEST PROTECTION FROM

Carts

Forklift

Pallet Trucks

APPLICATIONS

Food production plants (ex: Dairy production, Slaughterhouses, Beverage industry, all kind of food related production, kitchens ,hallways, etc..)

Chemical plants, Pharmaceutical plants, etc..

Bollards is a multi-functional product widely used in industrial, commercial and public environments.

FEATURES

- Material: Stainless Steel Grade 304, polished finish. 2 mm thickness
- Dome Top as standard, Slope Top and Flat Top also available.
- Base Plate fixed on ground level

DAMAGE PREVENTION

The high-strength posts help to safeguard the structures from any damage caused by accidental & dangerous impacts

MACHINERY PROTECTION

Bollards are used to protect machinery placed in critical areas; they absorb & dissipate impact force from forklift vehicles
